PROFESSIONAL PROFILE

QA Engineer with a background in architecture. For 2 years, I worked in product validation in the field and software validation, executing and meeting retail standards for the P&G brand. I now apply that knowledge to what is my main professional focus today. Focused on manual testing and API testing with Postman, with more than 150 test cases designed and executed for websites, mobile apps in Android Studio, and API testing. I have documented more than 70 bugs reported in Jira. Data validation in PostgreSQL through more than 20 basic database queries. I also have experience checking UI design through Figma and 20+ test cases for design validation in Google Chrome and Firefox using DevTools.

TECHNICAL SKILLS

Testing: API Testing (Postman), Test Case Design, Bug Reporting (Jira)

Data and Web: PostgreSQL (basic queries), Chrome DevTools, Figma (UI/UX validation)

Methodologies: SDLC, Field Validation, Compliance Auditing

TECHNICAL EXPERIENCE

- **Responsibilities:** Design and execution of manual functional tests for websites and mobile apps. Validation of UI designs against Figma designs and behavior in Chrome and Firefox using DevTools.
- **Objectives:** Ensure software quality through different tools, from design validation to database data integration. Constant communication with the development team for early error detection from the earliest stages.
- **Tools:** Postman | Jira | PostgreSQL | Chrome DevTools | Firefox DevTools | Figma | Android Studio.
- **Achievements:** Foundational experience in UI design validation and working under strict standards. Requirements analysis for websites and ApiDoc. More than 200 test cases across different tasks; Smoke Testing, API Testing on endpoints (GET, POST, PUT, PATCH, DELETE), UI Design, and Database testing. Ensured software quality in mobile applications and web pages.

PROJECTS

Guitar Flash - Video Game Website - QA Testing | 2026

Objectives:

- Design and execution of 20 test cases for design and functionality validation.
- Detection and documentation of 3 bugs with evidence and traceability in Jira.
- Validation of behavior in Chrome DevTools.

Achievement: Ensured the visual consistency of the video game and validated the site's behavior flow.

Tools: Jira, Chrome, ChatGPT AI.

Condusef - UI Testing | 2026

Objectives:

- Design of test scenarios for design validation.
- Detection and reporting of 1 bug by comparing site behavior between Chrome and Firefox.
- Defect documentation in Jira with reproduction steps, severity, and photographic evidence.

Achievement: Verified functionality and ensured the web page's behavior in both browsers.

Tools: Jira, Chrome and Firefox DevTools, ChatGPT AI.

Hotel Express — API Testing | 2026

Objectives:

- Design and execution of 21 test cases for the login scenario in the site's API.
- Validation of API behavior in HTTP requests and POST methods using equivalence values.
- Finding of 7 bugs with 404 Not Found errors and 2 bugs with 400 Bad Request errors, reported in Jira.

Achievement: Ensured the site's login quality by validating its behavior with POST methods through API Testing.

Tools: Jira, Postman, Chrome browser, ChatGPT AI.

EDUCATION

EDUCACIÓN LICENCIATURA EN ARQUITECTURA - Universidad Juárez Autónoma de Tabasco (UJAT)
2018-2021 (Trunca)

CERTIFICACIONES

CERTIFICACIÓN EN QA ENGINEER - TRIPLETEN LATAM

IDIOMAS

ESPAÑOL - NIVEL: NATIVO
INGLÉS - NIVEL: A2 BÁSICO
